

Data Governance

The Nicola Askham Methodology

This **"Getting Started in Data Governance"** course, provides you with all the information you need to make well informed choices about implementing your data governance programme so that your initiative is successful.

You will learn the unique and proven **Askham Data Governance Methodology** which will give you a structured approach to designing and successfully implementing a data governance framework that is right for your organisation.

Course Highlights:

- The scope of a data governance initiative
- The relationship between data governance and data quality
- The core requirements of an effective data governance strategy
- How to design a data governance framework for your organisation
- How to implement data governance without the tears

Who should attend this training:

The course is ideal for data governance managers and their teams who are either:

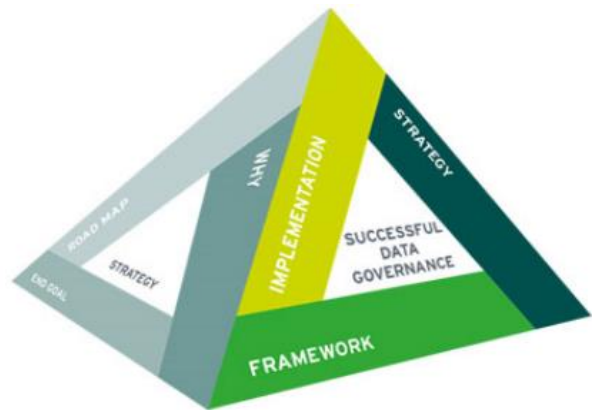

- Struggling to make their data governance initiative a success, or
- Just starting out and wondering where to start

Delivery Method

- Training workshop is Instructor-led
- Day 1 can be held at Velisa Africa if attendees are from different companies, OR
- Day 1 can be held on-site if all attendees are from the same company. This allows for more in depth and company specific discussion.

Duration

- 1 day
- There is an optional second day which is held on-site to customise the methodology. This is both an expert consultation and practical training together.

Creating Data Governance Solutions

The Askham Pyramid is designed to simplify the Data Governance minefield, by making a successful data governance initiative simple, straight forward and achievable.

All successful projects need a structured framework and Data Governance is no exception. This unique methodology allows your project design to be flexible enough to meet the needs of your organisational culture, while at the same time easy enough for all levels of staff to understand from the outset.

The Askham Pyramid takes the key components of a successful data governance implementation and breaks it down into its constituent parts, in a manner that lets you work logically through them, while working on your data governance initiative.

Costs:

Minimum of 6 attendees
